

Description

This **HHA2211-D580** Aeroponics system is great for Sea of Green and fruiting plants like tomatoes. It includes a double tray with eleven (11) 2 inch net pots and two 400 watt 120 volt LED lights. These full-spectrum grow lights are switchable between grow and bloom. Included is UV and IR lighting for trichomb production.

Designed for small to medium sized plants like lettuce, spices and herbs.

Custom hanging frames available. Every system can easily be configured.

Patent Pending
