

Description

The **HHAS211-D3192R** This Aeroponics system is great for Sea of Green, but too powerful for Lettuce. It includes a single tray with eleven (11) 2 inch net pots and a 960 watt 120 volt Reflector LED light. This is a full spectrum light, it has both a grow and blooming spectrum with heavy emphasis on blooming. Included is UV and IR lighting for trichomb production.

Designed for small to medium sized plants like lettuce, spices and herbs.

Custom hanging frames available. Every system can easily be configured.

Patent Pending

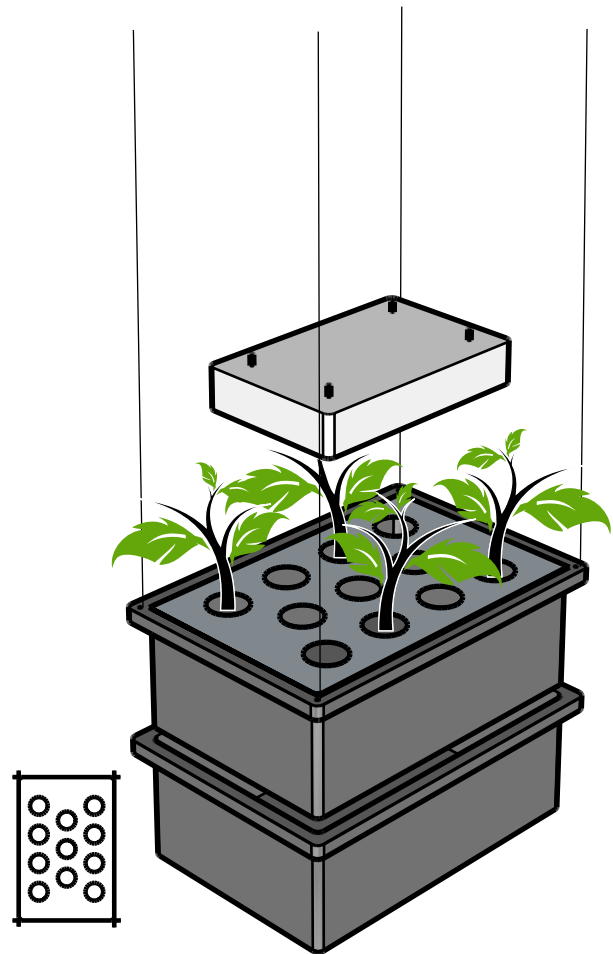

- *Easy-to-use and Looks Great*
- *Unbreakable trays with lifetime guarantee*
